

Religion in the United States

Bởi:

OpenStaxCollege

In examining the state of religion in the United States today, we see the complexity of religious life in our society, plus emerging trends like the rise of the megachurch, secularization, and the role of religion in social change.

Religion and Social Change

Religion has historically been an impetus to social change. The translation of sacred texts into everyday, non-scholarly language empowered people to shape their religions. Disagreements between religious groups and instances of religious persecution have led to wars and genocides. The United States is no stranger to religion as an agent of social change. In fact, our nation's first European arrivals were acting largely on religious convictions when they were compelled to settle in America.

Liberation Theology

Liberation theology began as a movement within the Roman Catholic Church in the 1950s and 1960s in Latin America, and it combines Christian principles with political activism. It uses the church to promote social change via the political arena, and it is most often seen in attempts to reduce or eliminate social injustice, discrimination, and poverty. A list of proponents of this kind of social justice (although some pre-date liberation theory) could include Francis of Assisi, Leo Tolstoy, Martin Luther King Jr., and Desmond Tutu.

Although begun as a moral reaction against the poverty caused by social injustice in that part of the world, today liberation theology is an international movement that encompasses many churches and denominations. Liberation theologians discuss theology from the point of view of the poor and the oppressed, and some interpret the scriptures as a call to action against poverty and injustice. In Europe and North America, feminist theology has emerged from liberation theology, as a movement to bring social justice to women.

Religious Leaders and the Rainbow of Gay Pride

What happens when a religious leader officiates a gay marriage against denomination policies? What about when that same minister defends the action in part by coming out and making her own lesbian relationship known to the church?

In the case of the Reverend Amy DeLong, it meant a church trial. Some leaders in her denomination assert that homosexuality is incompatible with their faith, while others feel this type of discrimination has no place in a modern church (Barrick 2011).

As the LBGT community increasingly advocates for, and earns, basic civil rights, how will religious communities respond? Many religious groups have traditionally discounted LBGT sexualities as “wrong.” However, these organizations have moved closer to respecting human rights by, for example, increasingly recognizing females as an equal gender. The Roman Catholic Church drew controversial attention to this issue in 2010 when the Vatican secretary of state suggested homosexuality was in part to blame for pedophilic sexual abuse scandals that have plagued the church (Beck 2010). Because numerous studies have shown there to be no relationship between homosexuality and pedophilia, nor a higher incidence of pedophilia among homosexuals than among heterosexuals (Beck 2010), the Vatican’s comments seem suspect.

No matter the situation, most religions have a tenuous (at best) relationship with practitioners and leaders in the gay community. As one of the earliest Christian denominations to break barriers by ordaining women to serve as pastors, will Amy DeLong’s United Methodist denomination also be a leader in LBGT rights within Christian churchgoing society?

Megachurches

A megachurch is a Christian church that has a very large congregation averaging more than 2,000 people who attend regular weekly services. As of 2009, the largest megachurch in the United States was in Houston Texas, boasting an average weekly attendance of more than 43,000 (Bogan 2009). Megachurches exist in other parts of the world, especially in South Korea, Brazil, and several African countries, but the rise of the megachurch in the United States is a fairly recent phenomenon that has developed primarily in California, Florida, Georgia, and Texas.

Since 1970 the number of megachurches in this country has grown from about 50 to more than 1,000, most of which are attached to the Southern Baptist denomination (Bogan 2009). Approximately 6 million people are members of these churches (Bird and Thumma 2011). The architecture of these church buildings often resembles a sport or concert arena. The church may include jumbotrons (large-screen televisual technology usually used in sports arenas to show close-up shots of an event). Worship services feature contemporary music with drums and electric guitars and use state-of-the-art sound equipment. The buildings sometimes include food courts, sports and recreation

facilities, and bookstores. Services such as child care and mental health counseling are often offered.

Typically, a single, highly charismatic pastor leads the megachurch; at present, all are male. Some megachurches and their preachers have a huge television presence, and viewers all around the country watch and respond to their shows and fundraising.

Besides size, U.S. megachurches share other traits, including conservative theology, evangelism, use of technology and social networking (Facebook, Twitter, podcasts, blogs), hugely charismatic leaders, few financial struggles, multiple sites, and predominantly white membership. They list their main focuses as youth activities, community service, and study of the Scripture (Hartford Institute for Religion Research b).

Critics of megachurches believe they are too large to promote close relationships among fellow church members or the pastor, as could occur in smaller houses of worship. Supporters note that, in addition to the large worship services, congregations generally meet in small groups and some megachurches have informal events throughout the week to allow for community-building (Hartford Institute for Religion Research a).

Secularization

Historical sociologists Émile Durkheim, Max Weber, and Karl Marx and psychoanalyst Sigmund Freud anticipated secularization, claiming that the modernization of society would bring about a decrease in the influence of religion. Weber believed membership in distinguished clubs would outpace membership in Protestant sects as a way for people to gain authority or respect.

Conversely, some people contend that secularization is a root cause of many social problems, such as divorce, drug use, and educational downturn. Presidential contender Michele Bachmann even linked Hurricane Irene and the 2011 earthquake felt in Washington D.C. to politicians' failure to listen to God (Ward 2011).

While some scholars see the United States becoming increasingly secular, others observe a rise in fundamentalism. Compared to other democratic, industrialized countries, the U.S. is generally perceived to be a fairly religious nation. Whereas 65 percent of Americans in a 2009 Gallup survey said religion was an important part of their daily lives, the numbers were lower in Spain (49 percent), Canada (42 percent), France (30 percent), the United Kingdom (27 percent), and Sweden (17 percent) (Crabtree and Pelham 2009). Secularization interests social observers because it entails a pattern of change in a fundamental social institution.

Thank God for That Touchdown: Separation of Church and State

Imagine three public universities with football games scheduled on Saturday. At University A, a group of students in the stands who share the same faith decide to form a circle amid the spectators to pray for the team. For 15 minutes, people in the circle share their prayers aloud among their group. At University B, the team ahead at halftime decides to join together in prayer, giving thanks and seeking support from God. This lasts for the first 10 minutes of halftime on the sidelines of the field while spectators watch. At University C, the game program includes, among its opening moments, two minutes set aside for the team captain to share a prayer of his choosing with spectators.

In the tricky area of separation of church and state, which of these actions is allowed and which is forbidden? In these three fictional scenarios, the last example is against the law while the first two situations are perfectly acceptable.

In the United States, a nation founded on the principles of religious freedom (many settlers were escaping religious persecution in Europe), how stringently do we adhere to this ideal? How well do we respect people's right to practice any belief system of their choosing? The answer just might depend on what religion you practice.

In 2003, for example, a lawsuit escalated in Alabama regarding a monument to the Ten Commandments in a public building. In response, a poll was conducted by *USA Today*, CNN, and Gallup. Among the findings: 70 percent of people approved of a Christian Ten Commandments monument in public, while only 33 percent approved of a monument to the Islamic Qur'an in the same space. Similarly, survey respondents showed a 64 percent approval of social programs run by Christian organizations, but only 41 percent approved of the same programs run by Muslim groups (Newport 2003).

These statistics suggest that, for most Americans, freedom of religion is less important than the religion under discussion. And this is precisely the point made by those who argue for separation of church and state. According to their contention, any state-sanctioned recognition of religion suggests endorsement of one belief system at the expense of all others—contradictory to the idea of freedom of religion.

So what violates separation of church and state and what is acceptable? A myriad of lawsuits continue to contribute to the answer. In the case of the three fictional examples above, the issue of spontaneity is key, as is the existence (or lack thereof) of planning on the part of event organizers.

The next time you're at a state event—political, public school, community—and the topic of religion comes up, consider where it falls in this debate.

Summary

Liberation theology combines Christian principles with political activism to address social injustice, discrimination, and poverty. Megachurches are those with a membership of more than 2,000 regular attendees, and they are a vibrant, growing and highly influential segment of American religious life. Some sociologists believe levels of religiosity in the United States are declining (called secularization), while others observe a rise in fundamentalism.

Section Quiz

Social scientists refer to the use of a church to combat social injustice in the political realm as:

1. the protestant work ethic
2. conflict management
3. liberation theology
4. justice work

Answer

C

Megachurches tend to have:

1. a variety of male and female clergy
2. numerous buildings in which to meet
3. high attendance for only a limited time
4. large arenas where services are held

Answer

D

Short Answer

Do you believe the United States is becoming more secularized or more fundamentalist? Comparing your generation to that of your parents or grandparents, what differences do you see in the relationship between religion and society? What would popular media have you believe is the state of religion in the United States today?
